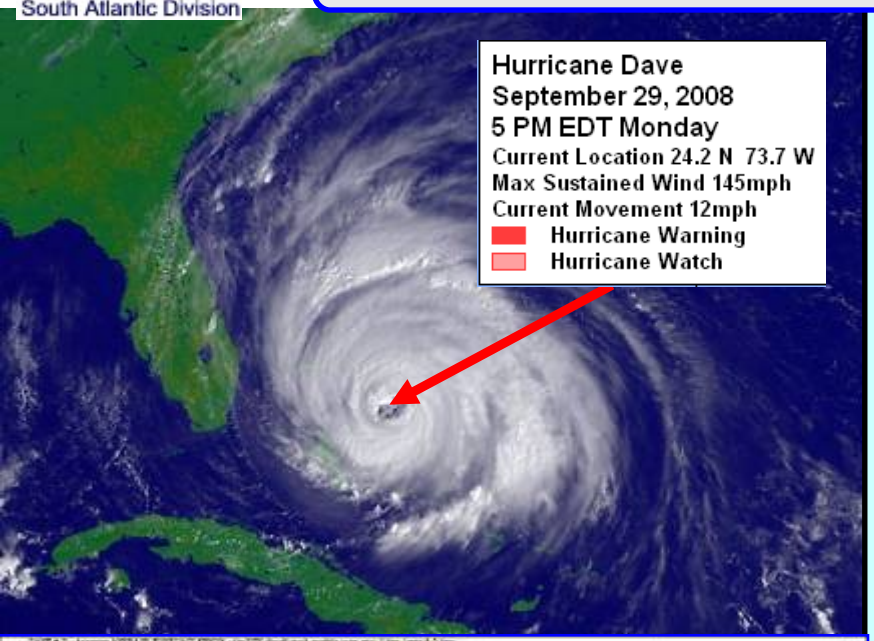
Hurricane "Dave" L-48 through L-24



SITUATION:

The National Hurricane Center has now upgraded Hurricane Dave to a powerful Category 4 Hurricane with maximum sustained winds near 145 mph. This is a deadly storm moving toward the US Southeast Coast. Forecast models are currently in agreement for a landfall within 48 to 24 hours somewhere between Jacksonville Florida and Savannah Georgia. The only good news is that the storm is forecast to loose strength before making landfall.

FEMA ACTIVITIES:

NATIONAL - The DHS National Operations Center (NOC), NRCC and LRC are at full activation Level I.

REGIONAL - FEMA Region IV RRCC has activated to Level I. IMAT/ERT-A Teams, as well as JFO Development teams have been activated and pre-deployed to pre-designated Distribution Centers in Florida**.** Teams are on standby for Georgia and Carolinas as well.

FEMA Region II has returned to Level III. The Region II RRCC in New York has been has returned to monitoring status.

USACE ACTIVITIES:

National - HQUSACE Operations Center (UOC) remains operational and has initiated daily Conference Calls. Coordination is on-going with the UOC and USACE Task Force Commander regarding assignment and deployments of PRTs, SMEs and ESF#3 Team Members. HQUSACE will publish Annex T (USACE Contingency Plan) shortly.
